#### SELF CLEANING FIRE POT

Revolutionary automatic cleaning system making the heating element more autonomous, allowing you to save time in routine maintenance and providing added convenience.

#### FIREX 600

All Ravelli's products have a combustion chamber made from FIREX 600, a vermiculite based material developed by Gruppo Ravelli after long and extensive research.

#### STAINLESS STEEL HEAT EXCHANGER

A stainless steel heat exchanger means increased fire resistance and reduced wear

#### REMOTE CONTROL WITH DISPLAY

A practical and convenient remote control allows you to adjust temperature and power as required. Moreover, it helps to perform the stove programming laying comfortably on the sofa.

#### ASH PAN

A functional and easily accessible ash pan collects all the burned out ash.
